Certain Information About Distributions

The determination of the tax attributes of FSK's distributions is made annually as of the end of its fiscal year based upon its taxable income and distributions paid, in each case, for the full year. Therefore, a determination as to the tax attributes of the distributions made on a quarterly basis may not be representative of the actual tax attributes for a full year. FSK intends to update stockholders quarterly with an estimated percentage of its distributions that resulted from taxable ordinary income. The actual tax characteristics of distributions to stockholders will be reported to stockholders annually on Form 1099-DIV.

The timing and amount of any future distributions on FSK's shares of common stock are subject to applicable legal restrictions and the sole discretion of its board of directors. There can be no assurance as to the amount or timing of any such future distributions.

FSK may fund its cash distributions to stockholders from any sources of funds legally available to it, including net investment income from operations, capital gains proceeds from the sale of assets, non-capital gains proceeds from the sale of assets, dividends or other distributions paid to it on account of preferred and common equity investments in portfolio companies, proceeds from the sale of shares of FSK's common stock and borrowings. FSK has not established limits on the amount of funds it may use from available sources to make distributions. There can be no assurance that FSK will be able to pay distributions at a specific rate or at all.

An investment in FS KKR Capital Corp. (FSK) involves a high degree of risk and may be considered speculative. Investors are advised to consider the investment objectives, risks, and charges, and expenses of FSK carefully. Investors should read and carefully consider all information found in FSK's prospectus and quarterly and annual reports filed with the U.S. Securities and Exchange Commission.
