Reconciliation of Non-GAAP Financial Measures

Adjusted net investment income is a non-GAAP financial measure. Adjusted net investment income is presented for all periods as GAAP net investment income excluding (i) the accrual for the capital gains incentive fee for realized and unrealized gains; (ii) excise taxes (net of incentive fee impact); (iii) the impact of accretion resulting from Merger accounting; and (iv) certain non-recurring operating expenses that are one-time in nature and are not representative of ongoing operating expenses incurred during FSK's normal course of business (referred to herein as one-time expenses). FSK uses this non-GAAP financial measure internally in analyzing financial results and believes that the use of this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends and in comparing its financial results with other business development companies. The presentation of this additional information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP. The following table provides a reconciliation of net investment income (the most comparable U.S. GAAP measure) to adjusted net investment income for the periods presented:

	For The Three Months Ended

Adjusted net realized and unrealized gain (loss) per share is a non-GAAP financial measure. Adjusted net realized and unrealized gain (loss) is presented for all periods as GAAP realized and unrealized gain (loss) to exclude the impact of Merger accounting. FSK uses this non-GAAP financial measure internally in analyzing financial results and believes that the use of this non-GAAP financial measure is useful to investors as an additional tool to evaluate ongoing results and trends and in comparing its financial results with other business development companies. The presentation of this additional information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP. The following table provides a reconciliation of net realized and unrealized gain (loss) per share (the most comparable U.S. GAAP measure) to adjusted net realized and unrealized gain (loss) per share for the periods presented:

Reconciliation of Non-GAAP Financial Measures (continued)

Net debt and net debt-to-equity ratio are non-GAAP financial measures. Net debt-to-equity ratio is debt outstanding including convertible preferred stock outstanding, net of cash, cash equivalents, restricted cash and foreign currency and net payable/receivable for investments purchased/sold and repaid, divided by net assets. FSK uses these non-GAAP financial measures internally to monitor and evaluate its leverage and financial condition and believes the presentation of these measures enhances investors' ability to analyze trends in FSK's business and to evaluate FSK's leverage and ability to take on additional debt. The presentation of this additional non-GAAP financial measure information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP. The following table provides a reconciliation of debt (the most comparable U.S. GAAP measure) to net debt and the calculation of net debt-to-equity ratio for FSK for the periods presented:
